

# HP ATP - Converged Infrastructure Integrator V1

This certification validates that you can implement an HPE Converged Infrastructure solution that integrates heterogeneous server, storage and networking functions into one holistically managed pool of IT resources. Such a solution can be dynamically provisioned, shared by many applications, offered on-demand, and ultimately managed as a service. This certification also verifies that you can incorporate virtualized servers, massive and redundant storage, high-speed networking, and high-availability for all. In addition, it verifies that you can perform all aspects of installation and start-up tasks through the HPE Matrix Operating Environment, including the following:

- Hardware configuration
- Operating system installation
- HPE driver installation
- Full management instrumentation

## Why earn this certification?

- To position yourself as a knowledgeable expert who can implement an HPE Converged Infrastructure that will increase IT speed and agility, drive utilization up and costs down, and build an optimized service delivery platform for both traditional IT and cloud services.
- To help organizations achieve greater IT investment protection and value.
- To become an HPE certified professional and enjoy benefits such as access to converged infrastructure technical tools, resources and HPE engineering experts.
- To be part of a community of fellow certified professionals for ongoing synergy and growth.
- To enhance your career advancement and job satisfaction as a certified expert.

## Candidate

Typical candidates for this certification are IT professionals who want the validated expertise to install, configure and optimize a converged infrastructure. Ideally, candidates should have 10 to 15 years experience in server, storage or networking implementation and administration.
