

HP ATP - Cloud Administrator V1

This certification validates that you can manage and administer HPE CloudSystem Matrix with HPE Cloud Service Automation for Matrix built on an HPE Converged Infrastructure with heterogeneous IT resource pools. This certification also validates that you can manage a service centric private cloud, simplify and optimize infrastructure to application service delivery. It also verifies that you can holistically optimize infrastructure, monitor applications, and maximize uptime for your unified cloud and traditional IT services.

Why earn this certification?

- To become a more valuable asset with validated core competencies to effectively administer an integrated, agile and secure cloud solution.
- To position yourself as a knowledgeable expert who can offer business value through your ability to accelerate cloud service innovations, increase agility, reduce costs and deliver superior service levels while also protecting current IT investments.
- To enhance your career advancement and job satisfaction as a certified expert.
- To be part of a community of fellow certified professionals for ongoing synergy and growth.

Candidate

Typical candidates for this certification have managed Blade server environments and used management software for converged infrastructures and basic virtualized environments.

Skill level

Professional
