

# HPE ASE - Hybrid IT Solutions Architect V1

This certification verifies that you can plan, design, recommend, and demonstrate HPE Hybrid IT solutions and deliver a proof-of-concept for a given solution to a customer. As a solution architect, you will focus on the right HPE solutions to deliver the customer's desired business outcome. You will leverage HPE compute, data center networking, storage, software-defined and cloud, hyperconverged, density, and mission critical solutions.

Additionally, this certification validates that you:

- Understand why customers are shifting to a Hybrid approach
- How to architect and design Hybrid IT solutions
- Recommend HPE compute, data center networking, storage, software-defined and cloud, hyperconverged, density, and mission critical solutions for customer use cases
- Can validate and present the solution

## Why Earn This Certification?

You will be able to

- Describe, differentiate, and apply industry standard architectures and technologies.
- Gather and analyze customer business and technical requirements
- Recommend and position HPE Hybrid IT products, solutions, tools, and appropriate services for customer use cases
- Architect and design an HPE solution based on customer needs
- Present and demonstrate the solution to the customer

## Candidate

Typical candidates for this certification have a minimum of three years of design and/or operational experience or equivalent in at least one of the core HPE areas (Server, Storage, and Networking) and six months design and/or operational experience or equivalent in other HPE solutions and technologies.
