HPE ASE – Edge-to-Cloud Architect

This certification verifies that you can translate business and technical requirements into a complete HPE solution design—storage, compute, and networking—considering all available consumption models and hosting locations. As a solution architect, you will focus on the right HPE solutions to deliver the customer's desired business outcome and will articulate financial implications of the solution.

Save up to 45% on this certification with HPE Certification Advantage Program.

Why earn this certification?

- Describe, differentiate, and apply IT industry trends, standard architectures, technologies, and cloud delivery models.
- Gather and analyze customer business and technical requirements.
- Recommend and position HPE offerings (solutions, products, and services) for customer use cases.
- Architect and design an HPE solution based on customer needs.
- Present and demonstrate the solution to the customer and coordinate implementation planning.

Candidate

Typical candidates for this certification are presales solution architects with a minimum of two to three years of hands-on experience or equivalent in designing solutions for midrange Enterprise customers with multiple HPE technologies: cloud services, compute, storage, networking, and services.

Steps to acquire this certification

Before you begin

Acquire access to The Learning Center and get an HPE Learner ID. If this certification requires a written or online exam (HPE0 or HPE6 or HPE2), then create a user profile with Pearson VUE, our exam vendor for proctored/online exams. Practical exams (HPE1 or HPE0-AxxxP) are delivered through PSI or Aruba Education Services, therefore no Pearson VUE user profile is required.

Step 1: Register or apply for this certification

Register for this certification in The Learning Center. This will make your progress toward this certification more visible within your learner transcripts and the HPE Learning Management Systems.
