

HPE ATP – Hybrid Cloud V1

This certification validates that you have foundational knowledge and skills of the HPE edge-to-cloud strategy, encompassing server, storage, networking, HPE GreenLake, management tools and their underlying architectures, technologies, and consumption strategies. Additionally this certification validates that you can evaluate customer requirements and recommend the best HPE offering (solutions, products, and services) for current and anticipated business needs.

Why earn this certification?

- Describe, differentiate, and apply IT industry trends, standard architectures, technologies, and cloud delivery models.
- Gather and analyze customer business and technical requirements.
- Recommend and position HPE offerings (solutions, products, and services) for customer use cases.
- Architect and design an HPE solution based on customers' needs.
- Present and demonstrate the solution to the customer and coordinate implementation planning.
- Install, configure, and upgrade HPE SMB solutions and their components.

Candidate

Typical candidates for this certification have a minimum of 6–12 months of experience in designing and/or implementing foundational HPE solutions for customers with at least one, but preferably more than one of the following HPE technologies: cloud services, compute, storage, networking, and services.
