

# Network Management with HPE Aruba Networking Central (AOS-8), Rev. 22.21

## Course description

The HPE Aruba Networking Central 2-day course covers the campus cloud-based management system that lets you centrally manage and monitor wired and wireless networks. This course covers the HPE Aruba Networking Central management service, including options for onboarding devices by managing Instant Access Points and switches both as a standalone customer or as an Managed Service Provider. Participants will view the advanced analytic services and connectivity health of devices and clients, providing insights into Wi-Fi analytics for smart business decisions. Participants will learn how to simplify visitor access management with a fully secure and scalable guest access solution including guest cloud services. This course also provides students the knowledge, skills, and practical experience required to set up, configure, and manage a network as a service offering. Through lecture and hands-on labs, students will discover the alert management, device connectivity, network health, and user account activity with HPE Aruba Networking Central.
