

HPE Solutions with SAP HANA, Rev. 23.11

Course description

The HPE Solutions with SAP HANA course is a self-paced training that is approximately 20 hours of self-directed content. It includes study material and activities in the ratio of approximately 15% activities and 85% study. Given a scenario, you will learn to design HPE-driven SAP solutions. You will learn to investigate customers' desired SAP HANA solution and then recommend the appropriate HPE tools and technologies to support that solution.

Course ID	0001200317
Course format, Typical duration	WBT - Web Based, Self Paced, 2 days 4 hours
Skill level	Advanced (ADV)
Delivery languages	English
Lab required	No

Ideal candidate for this course

This course is targeted to solution architects who have experience in designing and implementing complex solutions and want to validate their knowledge and skills to use and deploy HPE solutions with SAP HANA. The ideal candidate will have familiarity with SAP offerings and concepts and how these may be used to architect solutions that can help achieve customers' business outcomes.

Topics

- **The SAP Portfolio**
 - Summarize the SAP Portfolio
 - Differentiate the SAP workloads aligned to the customer's business processes
 - Understand the evolution of SAP business software (R2/R3/ERP/S4/BW4/BTP/RISE)
 - Summarize RISE with SAP, and differentiate it from prior SAP cloud initiatives
- **Introduction to SAP HANA**
 - Articulate the strategic role of SAP HANA in the SAP portfolio
 - Define SAP HANA system types, including on-premise and public cloud
 - Explain SAP HANA high availability and disaster tolerant features
 - Explain virtualization, multi-tenancy, consolidation, and cloud options
 - Explain storage, data backup and recovery options
- **SAP HANA certification requirements**
 - Know the reasoning behind SAP HANA hardware certification and implications
 - Locate SAP HANA certification requirements
- **HPE-driven SAP HANA Solutions**
 - Explain HPE SAP HANA infrastructure solution options
 - Recommend an HPE SAP HANA solution based on customer requirements
 - HPE GreenLake solutions and services for SAP HANA
- **Design HPE SAP HANA Solutions**
 - SAP tools and sizing approaches
 - Assess sizing results and determine hardware requirements
 - HPE tools and reference architectures
 - The HPE sales and ordering process

Objectives

After you successfully complete this course, expect to be able to:

- Perform an analysis of customer SAP workloads
- Determine the appropriate deployment models, sizing requirements, and service offerings
- Gather and evaluate the customer's requirements
- Design an HPE-driven SAP HANA solution as part of an overall SAP environment
- Articulate key differentiators of HPE solutions for SAP HANA
