

HPE Hybrid Cloud Solutions (inactive on July 01, 2026)

Exam description

This exam validates that you have foundational knowledge and skills of the HPE Hybrid Cloud strategy, encompassing HPE GreenLake, compute, storage, networking, and management tools and their underlying architectures, technologies, and consumption strategies.

Read the [Release Notes](#) to check for any recent updates to this exam.

Ideal candidate for this exam

Typical candidates for this exam are HPE partners, customers, and team members with a minimum of 6 months to one year of experience in designing and/or implementing foundational HPE solutions for customers using more than one of the following HPE technologies: HPE GreenLake, compute, storage, networking.

They:

- Assist with the design and participate in the integration and administration of foundational HPE solutions.
- Understand the high-level financial implications of the solution.

Exam contents

This exam has 50 questions. Here are types of questions to expect:

- Multiple choice (multiple responses), scenario based
- Multiple choice (single response)
- Drag-and-drop
- Point and click

Advice to help you take this exam

- Complete the training and review all course materials and documents before you take the exam.
- Use additional study materials such as HPE Press study guides and reference materials.
- Successful completion of the course or study materials alone does not ensure you will pass the exam.
- Exam items are based on expected knowledge acquired from job experience, an expected level of industry standard knowledge, or other prerequisites (events, supplemental materials, etc.).
- Exam items are not limited to course or study materials.

HPE Continuous Learning Badges are dynamic in nature, with frequent updates. HPE is diligent about keeping the exam aligned to the requirements but there may be a delay. HPE3 exams include a free second attempt to accommodate this scenario

Percentage of Exam	Sections/Objectives
10%	Describe, differentiate, and apply IT industry trends, standard architectures, technologies, and cloud delivery models <ul style="list-style-type: none"> Describe and differentiate IT Industry architectures and their appropriate use cases Describe and differentiate IT Industry technologies and their use cases
13%	Gather and analyze customer business and technical requirements <ul style="list-style-type: none"> Discover a customer's technical requirements
15%	Recommend and position HPE offerings (solutions, products, and services) for customer use cases <ul style="list-style-type: none"> Recognize and position how HPE offerings provide the customer business value and an advantage in their industry. Compare and contrast the customer experience of Traditional HPE offerings, HPE GreenLake Core offerings, GLCS, and cloud-based management for components of a solution. Describe HPE GreenLake offerings and benefits Describe and differentiate traditional HPE solutions and offerings
17%	Architect and design an HPE solution based on customer needs <ul style="list-style-type: none"> Given a customer workload/business requirement, select the appropriate delivery model or models Given a customer requirement, identify whether the customer will benefit from HPE GreenLake cloud services Given a set of customer requirements, select the appropriate HPE and 3rd party products and services for the solution Design a solution within the given constraints to meet customer technical objectives Document customer intent and solution design Review and validate a proposed design
5%	Present and Demonstrate the solution to the customer and coordinate implementation planning <ul style="list-style-type: none"> Discuss the solution with the customer's IT Staff
6%	Perform ongoing enhancements on a solution including upgrades, migration, optimization, etc. <ul style="list-style-type: none"> Compare a customer's existing architecture and capabilities to the customer's requirements Given a customer use case, help the customer plan for growth of their existing solution
12%	Install, configure, and upgrade HPE SMB solutions and their components <ul style="list-style-type: none"> Perform the physical installation process Configure each solution and subsystem Perform changes on a customer's existing solution and/or its subsystems
12%	Troubleshoot and repair HPE SMB solution components <ul style="list-style-type: none"> Describe investigative steps and their importance Identify and describe troubleshooting tools and their use cases Troubleshoot issues Perform repair/replace procedures Apply proactive maintenance
10%	Manage the HPE SMB solution <ul style="list-style-type: none"> Identify and describe management and administration tools and when to use them Perform Management and Monitoring tasks Administer and Operate the solutions

Sample questions

Sample questions are provided only as examples of question style, format and complexity/difficulty. They do not represent all question types and do not reflect all topic areas. These sample questions do not represent a practice test.

- Your customer wants to move their in-house programming activities to a more agile style of development. You need to recommend a platform for a DevOps approach to application development.

Which workload meets this requirement?

- VDI
- Containers
- Virtualization
- AI/ML

Answers

This section provides answers to and references for the sample questions.

1. Your customer wants to move their in-house programming activities to a more agile style of development. You need to recommend a platform for a DevOps approach to application development.

Which workload meets this requirement?

- a. VDI
- b. Containers
- c. Virtualization
- d. AI/ML
