Hewlett Packard Enterprise

Using HPE OneView

Exam description

This certification tests candidates' knowledge and skills on designing, deploying, and operating the HPE OneView management suite as the management and provisioning control plane for HPE products and solutions.

Ideal candidate for this exam

HPE customers, partners, and employees who configure, implement, support, and use OneView to manage HPE Hybrid IT solutions. The minimally qualified candidate will have basic industry standard storage, server and networking skills. They will have familiarity with the HPE Hybrid IT product portfolio.

Exam ID	HPE2-T37
Exam type	Web based
Exam duration	1 hour
Exam length	40 questions
Passing score	70%
Delivery languages	English

Register for this Exam
You need an HPE Learner ID and a Pearson VUE login and password.

No reference material is allowed at the testing site. This exam may contain beta test items for experimental purposes.

Exam contents

This exam has 40 questions. Here are types of questions to expect:
- Matching
- Multiple choice (multiple responses)
- Multiple choice (single response)
- Drag-and-drop
- Point and click

Advice to help you take this exam

- Complete the training and review all course materials and documents before you take the exam.
- Use HPE Press study guides and additional reference materials; study guides, practice tests, and HPE books.
- Exam items are based on expected knowledge acquired from job experience, an expected level of industry standard knowledge, or other prerequisites (events, supplemental materials, etc.).
- Successful completion of the course or study materials alone, does not ensure you will pass the exam.

Additional study materials
- HPE2-T37 Practice Test
- HPE Product Certified – OneView Study Guide

Objectives

This exam validates that you can:

Percentage of Exam	Sections/Objectives
2%	Describe industry standard data center infrastructure management technologies
13%	Describe HPE OneView and its elements and positioning for customer business outcomes
15%	Architect and design a data center management solution using the HPE OneView
27%	Install and configure HPE OneView and related elements
24%	Provision Hybrid IT infrastructure using HPE OneView
11%	Manage and report on Hybrid IT infrastructure using HPE OneView
8%	Monitor and troubleshoot common Hybrid IT infrastructure issues using HPE OneView

Sample questions

Sample questions are provided only as examples of question style, format and complexity/difficulty. They do not represent all question types and do not reflect all topic areas. These sample questions do not represent a practice test.

1. Your customer plans to manage an HPE BladeSystem enclosure with 16 blade servers and two HPE Virtual Connect modules installed. They also plan to use HPE OneView to manage two HPE Primera arrays.

   How many HPE OneView Advanced licenses will be required for this environment?
   a. 16
   b. 17
   c. 18
   d. 20

2. You want to put two FlexNICs into a single Link Aggregation Group within a server profile.

   What is a prerequisite for this setup?
   a. Both FlexNICs must be configured with the same speed.
   b. An upgrade license must be purchased and deployed.
   c. The Compute Module profile must have exactly two connections defined.
   d. The sFlow option must be enabled and configured.

3. To increase security, your customer wants to enable Secure Boot for HPE Synergy 480 Gen10 Compute Modules.

   Which boot mode option should be configured in a server profile to enable the required option?
   a. UEFI
   b. UEFI optimized
   c. Legacy BIOS
   d. EFI

Answers
