

Advanced HPE Compute Integrator Solutions Written Exam

Exam description

This exam validates your ability to implement workload solutions to achieve an organization's technological, financial, and business goals. It provides the assurance that you will be able to create complex solutions—from the proposal stage to live deployment—using the appropriate HPE compute and partner solution portfolios. This includes performing a right-mix analysis of the customer workload and identifying the appropriate consumption model. See release notes for additional information.

Ideal candidate for this exam

This exam is the written component of the HPE Master ASE - Compute Integrator Solutions certification. Candidates typically have many years of experience implementing infrastructure solutions for specific workloads to achieve customer business outcomes. This experience includes implementing, automating, orchestrating, and managing servers and their attached infrastructure options to optimize the resiliency, availability, performance, and manageability of hosted workloads.

Exam contents

This exam has 40 questions.

Advice to help you take this exam

- Complete the training and review all course materials and documents before you take the exam.
- Exam items are based on expected knowledge acquired from job experience, an expected level of industry standard knowledge, or other prerequisites (events, supplemental materials, etc.).
- Successful completion of the course or study materials alone, does not ensure you will pass the exam.

Exam preparation resources

- HPE Master ASE - Compute Integrator Solutions modular curriculum (HPE Tech Pro)

Objectives

This exam validates that you can:

Exam ID	HPE7-S02
Exam type	Proctored
Exam duration	1 hour 30 minutes
Exam length	40 questions
Passing score	65%
Delivery languages	English, Japanese, Korean
