EXAM INSTRUCTION GUIDE

Course: Designing HPE Advanced Hybrid IT Solutions

The exam

This exam is unlike any other HPE exam you have taken. Thus, it requires a different kind of preparation. You are expected to draw skills and knowledge not only from the course material for this certification and the preceding ATP and ASE level certifications, but also from years of personal experience in the field.

This exam will also be delivered in a completely new way. You will need to answer written questions about your knowledge and job skills in the Discrete Option Multiple Choice (DOMC) item format (see below). You will also be accessing mock-customer environments and answering questions or performing tasks in those environments. These are referred to as practical items (see below), since they require you to perform your practical skills rather than simply answer questions about them.

This exam will be delivered online with a remote proctor. It will be in a new environment, through a new delivery provider. Registering for the exam and accessing the exam will happen through a new system. Familiarize yourself with the new access method so you will be able to get to your exam easily at your scheduled time.

Read carefully through the sections below to ensure you are familiar with this new style of exam and are prepared to navigate the environment and perform all necessary tasks.

Recommended study materials

Master ASE - Designing HPE Advanced Hybrid IT Solutions course: Attending the certification course is always recommended to ensure you are familiar with the content areas that will be covered. This course is particularly critical because the lab exercises in the course are specifically designed to help prepare you for what you will encounter on the exam.

ATP and ASE Hybrid Architect courses: The Master ASE Hybrid IT course assumes proficiency of all skills and knowledge from the previous certification courses. If you do not hold the ATP and ASE Hybrid IT certifications, review these courses (or HPE Press Study Guides) to ensure that you have the appropriate baseline of knowledge before enrolling in the more advanced Master ASE course.

Samples: Because this exam is being delivered in such a new way, it is critical to familiarize yourself with what you will be required to do in the exam. Follow the links in the item types below to experience some sample items and see walkthroughs of the exam environment.

Item types

Discrete Option Multiple Choice (DOMC) items

DOMC items are like regular multiple-choice items, except you will only see one option at a time, rather than the whole set. You may see one or more options for each item, depending on the item and how you answer. To learn more about DOMC items in general and for lots of samples on generic topics, go to <http://trydomc.com/home>

To experience some sample DOMC items covering HPE content similar to what you will see on the exam, [follow this link](#).

Practical items

You will be accessing multiple mock-customer environments through VPN. You will need to analyze the environments to identify components, find issues, and compare them to customer requirements. Some test items will require you to access the environment and analyze it or perform tasks, then answer a written item about what you saw or did. Other items will require you to perform a task in the environment, and then you will click a button to submit your work and analysis will be performed in real-time to score your results.

Available tools and resources

In the practical environment, you will have access to a wide variety of tools and resources, as you would in a normal working environment. Ensure you are familiar with using these tools and resources so you can take full advantage of their presence in the time available to you. Among these resources are:

- HPE OneView
- Course student guide
- Course lab guide
- Product Bulletin
- Sizing tools
- Many other tools and resources that you would use when performing your job

Sample walkthrough

This walkthrough will show you sample practical items as they will appear on the exam. The intent of these items is not to show you the breadth of content areas that will be covered in the exam. Instead, it is meant to show you how to access the test environment and various customer scenarios you will encounter within it as you go through the exam. It will enable you to see what the environment will look like and how to access the different parts of the environment you will need during the exam. Familiarity with the environment prior to your test day will be a major advantage as you execute the necessary tasks within the timeframe allowed.

Registering for the exam

First, you will need to register for the exam and schedule your exam time in the MyLearning Portal. To do so, follow the link below. You will need to click Yes to several candidate agreement terms, then you will get the link to register.

You must schedule your exam at least 48 hours before you want to take it. Scheduling will be limited, and you will need to select an available time.

[Register for the exam](#)

Launching the exam

15 minutes before your scheduled exam time, follow the link below (which is the same as the registration link above). You will need to agree to the candidate agreement terms again to reach the exam launch page. Once you have done so, instead of the registration page, it will now show you the exam launch page.

Once you enter the exam, you will need to take a picture of yourself and your photo ID with your webcam, then perform a thorough sweep of your room including desk, walls, floor, and ceiling. The only things you can have accessible are two sheets of blank scratch paper and a writing utensil.

[Launch the exam](#)

During the exam

The exam time limit is four hours. Each section has a recommended amount of time to dedicate to those items, but you are welcome to allocate your time as you choose, as long as you complete the exam in the allotted time.

Section 1: DOMC items only. Recommended time: 45 minutes

Section 2: Practical items. Recommended time: 120 minutes

Section 3: Practical items. Recommended time: 75 minutes

You will not be permitted to go back and review items. Do not move on to the next item until you have answered the one you are on.

You will be allowed to take breaks up to 15 minutes during the exam. If you do not return within 15 minutes, your proctor will terminate your exam.

The full list of rules to which you must adhere during your exam session can be found in the [Proctor Rules document](#).

When you are finished with all sections of the exam, click the "Submit and end exam" button and wait for your score report. The report will show on your screen shortly after you complete the exam. Once you have reviewed your score report, you can email it to yourself for your records by using the "Email" button at the top right. When you are done with the score report, you must message your proctor to let them know you are ready to terminate your exam session.

After the exam

If you pass, your results will be visible in your profile in SABA within 48 hours.

If you fail the exam, you must wait 14 days before you can take it again.

Rescheduling or canceling your exam

If you need to reschedule or cancel your exam, you can do so from the PSI scheduling page. To get there, follow the link in the “Scheduling your exam” section above.
